**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-21 and 1-9 of U.S. Patent No. 6,737,505. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claimed formula is included in the broad teachings of claim 12 of the reference in that if R' is methoxy (claim 13), POLY is poly(ethylene glycol) (claim 15); Q is O (claim 1); Z is methyl group (claims 18-19); m=2 (claim 20) then claim 12 of the reference is identical with the instant claim 21.

Therefore, it would have been obvious to one of ordinary skill in the art to select the variations from the claims of the reference within the limitations of the instant claims to get the product, a conjugate of the claimed formula since they have been shown to be effective in a similar system and thus would have been expected to provide

adequate results. There is no showing of unexpected results derived from said selections.

Claims 31-44 are allowed.
